- ▶ AV solutions and integration
- ▶ Wireless solutions
- ▶ Data Centers
- ▶ Cloud Computing
- ▶ Storage / Servers / Virtualization

ABOUT US

NewRAS Technologies was established in the prestigious Jumeirah Lakes Towers (also called JLT) business district of Dubai in mid 2011 and its goal was purely to resolve, sustain and support major IT challenges of leading Corporates, Enterprises and Government institutions within the UAE.

Our Vision is to deliver IT software, hardware and networking solutions including training keeping our client's requirements first and foremost.

Our Mission is to excel and provide expertise in areas of networking, datacenters, virtualization, security and wireless.

Our Values are honest smart work and to integrate a collaborative IT infrastructure taking a solutions approach rather than a product approach.

As such you will find us partnering with a host of major IT vendors to give you best in class of technologies and provide expert skills of implementation within UAE and possibly to other GCC countries as well.

OUR SERVICES

NewRAS understands that a key criterion for high-performance (always on) business is a solid IT infrastructure running right from the core to the edge. Backed by multi-vendor partnerships and certified engineers, we meet your business requirements.

Intelligent Networks

Today's networks need a seamless integration whether wired or wireless & need to offer high-speed Carrier class ability to all businesses. NewRAS has strategically partnered with a leader in high-speed Ethernet networking solutions with the target to make your network mobile.

Secure Networks

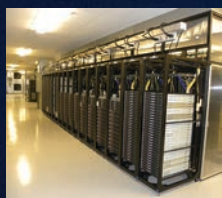

Networking arena is highly controlled on the perimeter as well as the content flow due to the surging use of the internet. Two major partnerships of NewRAS will take care of both the key fields with Next Generation Firewalls, UTM, VPN, anti-spam for Emails as well as back-up and recovery.

Collaboration

Unified Communications (UC) and collaboration technologies can help companies boost productivity, cut costs and reduce their carbon footprint. Our solution portfolio incorporates fully virtualized IP telephony, multimedia email, streaming media and videoconferencing solutions to achieve these results.

Data Centers

NewRAS offers to plan, design and deploy your next generation data center infrastructure that brings the benefits of agility, lower operational costs, better utilization and rapid application deployment. We have experts in the field of data center architectural solutions.

Cloud Computing

With the advent of Cloud Computing, integration challenges have emerged and we offer to develop strategies and build cloud applications and infrastructure. We will help our clients with the complex integration of their IT systems, coupled with consulting.

Software Solutions

At the heart of any business is its application software and NewRAS offers Integrated Software Solutions whether ready to use or Custom built (for web, mobile and any touch screen device). We also offer outsourcing services on short-term or long-term basis both on-site as well as off-shore.

Why NewRAS ?
